All food shall be from an approved and inspected source, except fresh or frozen fruits and vegetables.

CONCLUSION SUMMARY

The children were served raw milk at the daycare. This was part of a butter making lesson. As a result there were 3 confirmed cases of campylobacter and 11 other children showed symptoms but were not tested. The sanitation inspection indicates no unpasteurized milk will be served at a facility. The staff served a food from an unapproved source. Based on the information received, the allegations are substantiated.
